

Description of Treatment

A Flea treatment consists of our technicians treating:

- All carpeted areas internally
- Any pet sleeping areas/kennels
- Rood void and subfloor (if applicable)
- Around all external walls, windows, door frames, outside entertainment areas, fences & gardens.
- Shedding and Garages (Internally & externally) and any areas deemed necessary and safe by our technicians.

Thank you for choosing Gippsland Pest Management for your Flea Treatment, prior to our arrival please ensure the following has been carried out:

1. General Housekeeping has been carried out, and that all floor areas have been cleared to allow access for treatment. eg. kids toys and clothes have been placed off the floor area onto their bed
2. Vaccuming all internal floor areas before the treatment and the day after the treatment, as the vibrations cause the flea eggs to hatch
3. All lawn areas need to be well maintained and low to allow the chemical to penetrate the soil below
4. Ensure all shoes and pet bowls have been brought inside away from the external treatment area.
5. Ensure washing has been removed from your clothesline.
6. Ensure all windows and doors are closed prior to and during treatment and until the chemical has dried. Approx. 1-2 hours.
7. That arrangements have been made for all pets such as dogs, cats, birds, fish, rabbits and guinea pigs to be isolated away from the treated areas until they are dry (this may require them to be offsite for 4-24 hours)
8. That arrangements have been made to vacate the premises after our technicians arrival for a minimum of 4 hours
9. That our technicians are aware of any ponds or pet fish at the property.
10. All shedding and garage areas that you would like treated are unlocked and access is available for our technician.
11. Please advise our technicians if there are any areas of your home you would like to have excluded for our technician

Payment Options

Payment for this treatment is required on the day of treatment, Gippsland Pest Management can accept payment via Cash, EFT & Cheque.

Pet Treatment

To gain the maximum benefit, we would highly recommend treating your pets for fleas on the same day that your home is treated.
