

# Bees & Wasp Pre-Treatment Checklist

**GIPPSLAND**  
PEST MANAGEMENT

## Description of Treatment

A Bee & Wasp Treatment consists of our technicians:

- Locating the initial nest, hive or swarm
- Treating the nest, hive or swarm as well as the surrounding area for immediate control
- Dust the nest, hive or swarm to prevent re-establishment
- The nest should have decreased in activity within the first 24 hours and after 7 days there should be no activity at all

## Control Period & After Care Program

The Bee & Wasp treatment does have a 30 days after care program where our technicians can come back and retreat the nest. As it can take up to 7 days for the nest to be fully eliminated, our technicians wouldnt reattend the property within the first 7 days, however after this control period has passed if you are still experiencing issues please dont hesitate to contact us on 0458 003 430

## Payment Options

Payment for this treatment is required on the day of treatment, Gippsland Pest Management can accept payment via Cash, EFT & Cheque.
